

SENSITIZATION WORKSHOP ON CITY GAS DISTRIBUTION (CGD)

Programme

Venue	:	ATI Auditorium, MINECO, Aizawl
Date	:	12 th February, 2025 (Thursday) at 10:00 AM
Chief Guest	:	Shri B. Lalchhanzova, Hon'ble Minister, Food, Civil Supplies & Consumer Affairs
Guest of Honour	:	Shri Pralay Patra, Managing Director TNGCL

(Registration & Tea/Coffee – 10:00 to 11:00)

Compere	:	C. Lalramthangi (Arami Chawngthu), Hindi Teacher, PM Shri MICE High School, Tuikual North
Welcome Address	:	Smt. Teresy Vanlalhruii, Secretary, FCS&CA
Speech	:	Chief Guest
Speech	:	Guest of Honour (from TNGCL)
Presentation	:	TNGCL
Q & A	:	Interactive Session
Vote of thanks	:	Smt. Saizikpuii, Director, FCS&CA

Lunch will be served

SENSITIZATION WORKSHOP ON CITY GAS DISTRIBUTION

A one day sensitization workshop on city gas distribution was held at ATI Auditorium, MINECO, Aizawl on 12th February, 2025. The workshop starts at 11:00 am, roughly about forty students attend the workshop along with two Respective teachers - Dr. Maria Lalrinmawii and Ms. Zizi Kithie.

The workshop was hosted by Smt. Lalramthangi, followed by a welcoming address for our Guest of Honour Shri Pralay Patra, Managing director of TNGCL by Smt. Teresy Vanlalhruali Secretary, FCSA&CA. After that a felicitation programme took place with a speech from our Chief Guest Shri. B. Lalchhanzova, Hon'ble Minister of Food, Civil Supplies & Consumer Affairs. Later on our guest of honour have a Long short speech regarding the use of PNG over LPG, followed by a Presentation from TNGCL.

The presentation highlights the future of TNGCL and how PNG is more economical than LPG. It also highlights the benefits, supply chain and production line and safety of PNG. After the presentation there is an active interaction with the presenter and the audience. A question Regarding the safety hazards and leakages of the pipe since Mizoram is prone to landslide and whether the combustion can effect other pipeline and cause more explosion in a case of densely populated area regarding on the geographical area of Aizawl. After the interaction for closure a vote of thanks was given by Smt. Saizikpuii, Director of FCS&CA.

Benefit of PNG

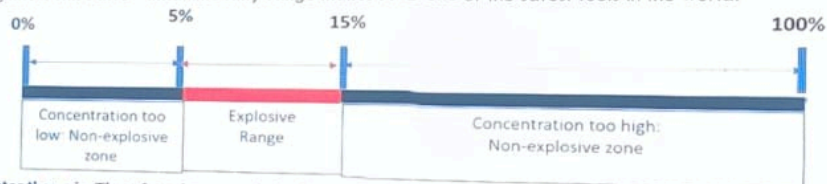

Uninterrupted supply

PNG offers the convenience of ensuring continuous and adequate supply of PNG at all times, without any problem of storing gas in cylinders.

Safety:

The combustible mixture of natural gas and air does not ignite if the mixture is leaner than 5% and richer than 15% of the air-fuel ratio required for ignition. This narrow inflammability range makes PNG one of the safest fuels in the world.

Natural gas is lighter than air. Therefore, in case of a leakage, it just rises and disperses into thin air given adequate ventilation. Being heavier will settle at the bottom near the floor surface.

A large quantity of LPG is stored in liquefied form in a cylinder. With PNG, it is safer since PNG installation inside your premises is a limited quantity of natural gas at low pressure i.e. 21 millibar (mbar).

On leakage, LPG expands 250 times, which is not the case with PNG. Supply in PNG can be switched off through appliance valve (kitchen) and isolation valve (outside kitchen premises), which fully cuts off the gas supply.
